HUNG TRAN
Software Engineer
Houston, TX | (281) 928-6100

jakehadden.com | https://github.com/hptran7 | https://www.linkedin.com/in/hungtran0713/ | tran.hung0713@gmail.com

Creative software engineer with the ability to pick up new languages and technologies as needed. Prior to being a software engineer, I worked as an Account Executive for Sunrise Plastics where I work closely with the Vice President of Sales to manage main accounts that take up 60-70% sales of the firm.

Software Development Skills
- Debugging, JavaScript, Typescript ,Python, Node.js, React, Express, Redux, RESTful API, PostgreSQL, Sequalize, Bootstrap, Flexbox AWS, React Native, HTML, CSS, MongoDB.

Education
The University of Houston | B.A. in Finances, minor in Accounting | Houston, TX   2015 – May 2018

DigitalCrafts | Certificate in Software Engineering | Houston, TX   Sep 2020 – Jan 2021
- Software engineering training program covering full-stack development including, but not limited to JavaScript, Python, including an emphasis on cutting-edge frameworks like React/Redux and server-side technologies including Node.js, Express, and PostgreSQL.

Software Development Portfolio
Knitworthy | knitworthy.net | github.com/abbeyperini/Knitworthy.git   Oct 2020
- Knitworthy compares project data to real life time and length measurements to put the time and length of yarn that goes into a project into perspective for someone who does not knit or crochet
- Primary responsibility included creating function to store fetch data from Ravelry API and implanting filter and sort function for users to arrange data into meaningful order.
- Knitworthy is built with Javascript, HTML, CSS, Bootstrap, and Surge.

RecipeBox | dc-recipebox.herokuapp.com | github.com/hptran7/Recipes-Project.git   Nov 2020
- Recipe Box is your Modern day Recipe Book, it can help even the most seasoned Cooks to very easily store and manage their Recipes on the fly while also enabling the culinary curious use to browse thousands of new recipes, via search by dish/ingredient.
- Responsibilities included integrate Spoonacular API allowing users to search for their favorite recipe by either dish's name, ingredients or course.
- RecipeBox is built with Node.js, Express, SQL and Mustache Express.

Event Master | http://event-master-dc.surge.sh/| github.com/hptran7/EventMaster.git   Dec 2020
- Event Master is an event sharing app. At its basic, Event Master is about highly customizable rapid event invitation creating. In addition to normal event creation, this app allows users to notify their guests about any changes, updates, or warning about Covid-19 exposure.
- Users can add, edit, delete event, or find a public event and send out invitations. Events are stored with date time strings and returned in chronological order based on time range.
- Built with React, Redux for frontend and Node.js, express, sequelize and PostgresSQL for backend
